

A Vision for Churches and Clinics

Letter of support for the realization of a vision the Lord has been preparing me for since 1st July 1970.

Planting churches and clinics, from Nigeria to West Africa and the rest of Africa.

Letter of Support for the Realization of a Vision

January 2010

Dear brethren,

Peace and love to you as I ask for your time to share a vision which the Lord has put in my heart. The vision may be summarized as a direction to dedicate the rest of my life to the ministry of planting churches and medical clinics attached to and run by the church with practical spiritual foundation of love and humility; also training both the church and the clinic to multiply, using local material and personnel as safe and as much as possible. I hereby seek your prayers, advice and support to realize the vision in the ways I explain below.

The Vision and Plan for Its Realization

The vision is to plant churches and/or clinics starting from Nigeria, expanding to the West Africa sub-region and then to the rest of Africa. The plan is to mobilize medical clinic equipment and personnel (for training) locally and/or in the United States from willing donors and volunteers to support the church and the clinics.

The Legal Vehicle for Work

A nonprofit 501(c)(3) has been incorporated both in Nigeria and the United States of America, named **LOGOS-RHEMA HUMAN SERVICES Inc.** This will serve as a vehicle to accelerate and mobilize professionals, personnel and volunteers to actualize the vision of planting churches and clinics run by the church, and subsequently train the church members and staff of the clinics to multiply.

The legal vehicle will be used to channel cooperation between stakeholders in the USA and Nigeria. The non-profit organization is being structured to generate jobs for Americans and Nigerians in the service of the Lord. An attorney in California is in charge of the non-profit organization. (Details about the mission and goals of the non-profit corporation are available on request.)

My Professional Training and Calling to Work for the Lord

I am a professional in various fields and have valuable skills in the areas of medicine (30 years' experience in general medical practice in Nigeria), ultrasound, theology and developmental management of disabled individuals.

I was trained as a medical doctor at the College of Medicine, University of Lagos, Nigeria, and acquired research skills at the University of Southern California, Los Angeles. I was licensed to practise family medicine in Nigeria for 30 years.

- In addition, I was trained in ultrasound at Thomas Jefferson University Institute of Ultrasound in Philadelphia.
- I also trained in caring for developmentally disabled individuals at the Department of Health of the State of California.
- By the grace of the Lord I am an ordained minister and licensed to preach. I was trained in theology at Fuller Theological Seminary in Pasadena, California, where I obtained a Master of Arts in Theology.

The Needs for the Realization of the Vision

- Your fervent prayer to the Lord to open ways for the realization of the vision for His glory;
- Introduction to professionals in the health industry and others for support by way of materials, equipment and personnel training;
- Financial support to meet immediate legal and running costs of the nonprofit corporation and personal expenses.

My Immediate Needs

I am currently in the stage of preparation for field work in Nigeria. While I am in the United States, it is necessary to take steps to be affiliated to a religious organization to facilitate building a network of support and provide an anchor for the work. Consequently, I am seeking a religious organization that will facilitate my free movement in and out of the USA and provide a home base for the realization of the vision.

In addition to the above, I need support to provide for my immediate needs to meet my minimum sustenance while in the USA. These include:

- Counsel and accountability from church members or church network groups.
- Support to cover my *minimum monthly budget, which includes unexpected expenses*, of \$780 (details and breakdown are available on request).

Again, I ask for your prayers, and if the Lord so leads you to assist me in any of the areas of the fulfilment of this vision, please get in touch through the Practical Love contact page.

Shalom.
